

Larson Pallet & Crating has been a trusted and respected supplier of pallets, crates, and wood products in the Bay Area for decades. In 2001, new, forward-thinking, professional management acquired the Company to inject fresh ideas and to take it to the next level. In 2004, to reflect our significant growth in crate manufacturing, we changed our name to Larson Pallet & Crating.

Larson Pallet & Crating has earned a reputation for quality manufacturing of custom-sized pallets and crates, and excellent customer service. We are growing in a declining market because we focus on what customers need. We help them manage shipping and warehouse costs by giving fast, professional service and delivering orders quickly.

We're here because of our customers, and we thank you for your business. If you haven't worked with us recently, give us a try—you'll see we have a fresh attitude, outlook, and some new faces. We look forward to understanding your needs and building a lasting relationship. We're moving forward, partnering with our customers to add value, lower costs, provide better service, and you'll find us energetic, efficient, flexible, and more competitive than ever.

The Right Choice

The Five Biggest Problems Businesses Have When Buying Wood Packaging Are:

1. NOT getting the right product specification for the job,
2. NOT getting the right quality,
3. NOT paying a reasonable price for that quality,
4. NOT getting fast, professional customer service from a reliable vendor, and
5. Spending way too much time and manpower managing wood packaging problems

At Larson Pallet & Crating We Eliminate These Problems By:

- Providing a Buyer's Guide to appropriately define the job requirement,
- Having a sawmill on-site so we can quickly cut and grade our own lumber ensuring the precise quality needed for each order,
- Buying wood in railcar loads and passing the savings on to our customers,
- Using a computerized customer ordering system that allows us to bring up all historical data for fast and accurate re-orders,
- Providing expedited production and fast delivery,
- Providing one-stop shopping for all of your pallet, crate, and wood recycling needs.
- Providing additional value-added services such as vendor-managed inventory, JIT delivery, automatic restocking, and blanket orders.

Our Customer Service "Peace Of Mind" Guarantee:

1. We won't ship pallets or crates that are out of spec
2. In an emergency, we deliver pallets and crates that are in stock in 4 hours or less
3. In an emergency, we deliver 50 custom pallets of any size, in 24 hours
4. In an emergency, we will handle your crating and packaging needs so you can ship within hours

Service

Design With over thirty years of experience and specialized software, we design pallets and crates to provide the functionality you need at the most economical price.

Fast, On-Time Production and Delivery We buy wood by the railcar load and have our own saw mill on-site, so we can produce any size pallet or crate quickly, efficiently, and accurately for small or large orders. Typical lead times are 1-2 days.

Customer Care Because our front and back-office operations are computerized, integrated, and staffed with professionals, you get quotes and orders processed quickly, and accurate answers to your questions within minutes. Re-orders can be taken in seconds.

On-site and In-house Packaging Our experienced packing crews will vacuum pack, protect, load, block and brace, containerize, and prepare your product and/or equipment for shipment and safe arrival anywhere in

the world. At your site or at our facility.

Facility Moves Whether you're moving one piece of equipment or an entire production line, our logistics team can provide total project coordination and services from planning to completion.

Export Certification We are certified to produce heat-treated pallets and crates for export. We know the rules for each country and provide the phytosanitary certificates you need so your shipment will not be delayed in customs.

Vendor-Managed Inventory and JIT Delivery We can build your order in advance and hold it at our facility. And, we can monitor your pallet and crate inventory at your site and re-supply as necessary. You'll never give it a second thought, run out, or invest in too much inventory. Plus you'll save management time and space at your facility!

Products

Our comprehensive manufacturing facility produces pallets, crates, skids, floater bases and wood components efficiently, consistently, and in virtually any size, style, or quantity.

Pallets The most economical and effective new pallet is custom designed for size, lift devices, load weight and type, number of uses, and other characteristics. The grade and amount of wood, the design, and the quantity produced are the major determinants of cost. Over-design means paying for more pallet than you need, and under-design can result in spilled load, injured workers, damaged products and other consequential expenses.

Pallets can be new, remanufactured or used. They can be heat treated for export, and can have solid panel decks. We also provide standard size plastic pallets, if you have special phytosanitary needs.

Crates and Heavy Duty Skids are designed for the size, weight, shape, fragility, sensitivity and destination of the item to be shipped. They may include floater bases and foam lining or supports for shock and vibration protection. Specialty hardware, blocking and ramps may be included to facilitate reuse or loading. Over-design means paying for more wood, hardware and labor than you need, and under-design can lead to damaged equipment and other consequential expenses.

Tree Boxes Standard tree boxes for wholesale nurseries. 24", 36", 48" standard and custom sizes and designs available. We use high quality west coast lumber, galvanized steel strapping and clinching nails. You won't find a higher quality, more consistent tree box

Other Products Point-Of-Sale Plant, Bulb and Nursery Racks, Air Trays, CNC Manufactured components, Cut-to-size components and dunnage, and wood chips. See our website for more details

Recycling

We pick up unwanted pallets and wood waste for our full-service customers at no cost, saving the expense of disposal fees. And we take it all, not just the good stuff.
